

One Stop Drop® *A little drop to show you care™.*
All Purpose Essential Oil Blend Concentrate™
Head Lice Information Sheet
Control Head Lice Stress with One Stop Drop.

One Stop Drop™ Essential Oil Blend Concentrate is made from a very special blend of high quality pure essential oils: containing Lavender, Eucalyptus and Melaleuca (Tea Tree). Together, their qualities provide an alternative for a wide range of health conditions and promote the general health and well being of those that use it. More information on the multiple benefits of One Stop Drop can be obtained from www.onestopdrop.com.au
These essential oils have been used for many years to control/manage Head Lice. One Stop Drop is available in an easy to use drop dispenser bottle and comes with a Quick Reference User Guide for your ease and convenience. *For active control of Head Lice and many other practical applications use One Stop Drop Essential Oil Blend Concentrate.*

***How do I know if I have Head Lice?** Head Lice may be present if you notice regular itching of the scalp, scalp irritation, or on inspection you may find small parasitic creatures of about 1- 2mm in length in the hair close to the scalp. They may be sandy/brown or grey in colour. Small eggs may be present on hair shaft near the scalp and be sandy/brown or silvery white. Head Lice have very strong claws and cling onto the hair very tight. They may also be very difficult to see. If you are at all suspicious of the presence of Head Lice or wish to manage head lice infestation, please follow the instructions below.*

Instructions for the use of One Stop Drop in Head Lice Management:

Maintenance:

Kids (over 7 years): Add 6 drops to a regular portion (approx. 20ml) of each of your shampoo and conditioner and blend together in your hand immediately prior to shampooing/ conditioning your hair. Then simply wash your hair as normal. Use on a regular basis to ensure effective management of head lice manifestation. May be done daily if you wish. However, if active Head Lice are a problem, please use the ***Intensive Hair Serum*** described below.

For kids 6 years: Add 4 Drops to a normal portion of shampoo and conditioner, and blend together in your hand immediately prior to shampooing/ conditioning your hair.

Adults: Add 12 drops to a regular portion of each of your shampoo and conditioner (20ml) and blend together in your hand immediately prior to shampooing/ conditioning your hair. Then simply wash your hair as normal. Use on a regular basis to ensure the effective maintenance of head lice manifestation. As above, continue with the ***Intensive Hair Serum*** if any Head Lice become evident.

Intensive Hair Serum:

Apply **30 drops (adults) / 20 drops (kids over 7 yrs) and 10 drops (kids 6 yrs & under) (*Not to be used in children under 2 years of age without medical advice)** to 50ml of vegetable oil (eg. olive oil, canola, macadamia), stir and apply to dry hair. Leave for at least 30 minutes then remove by shampooing hair as normal. Shampoo and condition as mentioned above then repeat Intensive Hair Serum again in one week.

*If you are having trouble creating lather, wet your hair slightly after you have added shampoo and continue. If you wet your hair first it becomes difficult for your shampoo to bind to the oil, therefore it becomes difficult to remove the oil and you are left with very greasy hair. Used as outlined above, this serum acts to deeply condition your hair and you will notice that it becomes soft and shiny and much more vibrant! Remember to use your One Stop Drop Essential Oil Concentrate in your conditioner after you have shampooed the ***Intensive Hair Serum*** out of your hair for extra control.

Washing your bed linen, hats, etc. It is a good idea to wash all linen and hats if active Head Lice are present. When doing your normal load of washing simply add 8 drops of your One Stop Drop Oil Concentrate, along with your regular washing powder into warm to hot water and choose a long wash cycle. Your linen will have a beautiful lingering smell of luxurious French Lavender. Enjoy the calming and soothing effects of One Stop Drop while you sleep.

Precautions: Use only as directed. Always read the label. Please keep out of reach of children. Never use undiluted. Not to be used in children under 2 years of age without medical advice. Discontinue if any adverse reaction occurs and contact your health care professional if symptoms persist. Always avoid eye area. Not to be taken.

****Please note: if it hasn't worked yet, keep using it. It may take a couple of weeks or so before you to build up a resistance, but you will eventually have a break through! Some eggs are very persistent and rebound breakouts can occur. You do not need to remove eggs with One Stop Drop. The regular washing will catch any remaining eggs as they hatch. Continue your One Stop Drop Oil Intensive Hair Serum every 4-5 days, then shampoo & condition using the Oil Concentrate in between. Control Head Lice stress with One Stop Drop.**

***If you have any questions or queries regarding One Stop Drop™, including use in pregnancy, please phone the One Stop Drop Information Hotline 1300 362 141 (for the cost of a local call).
